Question	Response
Comment on strengths and weaknesses of the instructor	Very confusing to listen too. Often did problems incorrectly and gave bad information. Often didn't know what he was doing. Consistently labeled the supply and demand curve incorrectly. Questions on quizzes were confusing and the grammar was very confusing and incorrectly used. Very hard grader and wouldn't explain why you got something wrong on a quiz.
-----	-----
Comment on strengths and weaknesses of the instructor	Very passionate about teaching and always did his best to give us real world examples to tie the course information together.
-----	-----
Comment on strengths and weaknesses of the instructor	Bila was a easy teacher to get in contact with. He needed to explain material a little better.
Comment on strengths and weaknesses of the course	The course was informative and gave opportunities to learn many example that would help on the exams or with quizzes in class.
Give suggestions on how the course or how the instruction could be improved.	Decent lab, but information could have been explained better.
-----	-----
Comment on strengths and weaknesses of the instructor	The instructor knew all the material very well, but was not very effective at teaching. He would some times make mistakes while explaining something, but i think most mistakes were due to nervousness.
Comment on strengths and weaknesses of the course	I think this course is a very good compliment to the lecture class because it focuses more on practical applications instead of theories and concepts.
Give suggestions on how the course or how the instruction could be improved.	I think we could receive more help on going over the online lab assignments, because they were really hard and sometimes hard to understand.
-----	-----
Comment on strengths and weaknesses of the instructor	Strengths: Treated all students with respect. Weaknesses: Did not explain the material very well. Gave little to no feedback on quizzes.
Comment on strengths and weaknesses of the course	Strengths: Homework was effective in helping me understand material at a higher level. Weaknesses: Problems would not relate to the actual class's material.
Give suggestions on how the course or how the instruction could be improved.	Relate the actual class to the lab more.

Comment on strengths and weaknesses of the instructor	He was a good instructor. Sometimes rushed through the slides, but with the amount of time provided, it was applicable.

Question	Response
Comment on strengths and weaknesses of the instructor	Bila is a nice fellow, but I could NOT understand what he was trying to say throughout the course's entirety. He couldn't speak English well, and I often left the class more confused than when I entered it. I didn't find the lab to be beneficial to my learning of the course at all. I know he is knowledgable of the subject, but being knowledgable and having the ability to communicate the material in a succinct way are two separate things.

Give suggestions on how the course or how the instruction could be improved.	Teacher was very helpful
